PROFILE

Computer Science graduate and freelance developer experienced in building full-stack web and mobile applications, from database design to deployment. Has shipped production software used by real clients, working across Flutter, Supabase/PostgreSQL, Firebase, and PHP. Comfortable collaborating on team codebases, managing releases, and turning client requirements into practical, working systems.

EXPERIENCE

Sta. Teresa Iguig, Cagayan

Freelance Software Developer

Iguig, Cagayan

June 2026 - Present

- Co-developed GUTVita, a production POS, inventory and MLM membership app, built with Flutter and Supabase and deployed to Android and Windows.

Cagayan State University - Andrews Campus Registrar

Programming and Office Intern

Tuguegarao City, Cagayan

Dec 2025 - Feb 2026

- Led the development and programming of a Records Management System, streamlining document workflows and reducing manual processing time for the registrar's office.
- Managed inventory management of student assets across 4 departments, ensuring accurate tracking and maintaining data integrity throughout the institution.
- Facilitated student enrollment processes and administered comprehensive student records and data, supporting accurate, up-to-date academic documentation across the registrar's operations.

PROJECTS

GUTVita | A cross-platform point-of-sale, inventory and multi-level marketing membership system for a multi-branch business.

- Implemented role-based access for 6 user roles, enforced at three layers: client route guards, Postgres row-level security, and admin-verified Edge Functions.
- Designed a trigger-driven commission engine in PostgreSQL that locks bonus amounts at purchase time, caps referral bonuses by package tier, and blocks withdrawals that would overdraw an account.

Records Management System | A web-based records management system for tracking physical records and storing digital student records.

- Developed a full-featured, web-based Records Management System using PHP, CSS, and SQL that digitized and centralized physical student records for the registrar's office, replacing a previously manual, paper-based process.

HireGround | A mobile application for empowering job seekers and connecting talent with opportunities using hybrid recommendation algorithms for personalized job matching.

- Designed and developed a mobile recruiting platform connecting job seekers and employers within Tuguegarao, built with Flutter and Firebase to support real-time, cross-platform functionality.

TECHNICAL SKILLS

- Language:** Python, Dart, C#, PHP, HTML, CSS, JavaScript, Java, Typescript
- Framework:** Flutter, Ionic, Angular, Next.js
- Database:** Firebase, PostgreSQL, MySQL, Supabase
- Development Tools:** Git, GitHub, VS Code, XAMPP, Android Studio

SOFT SKILLS

- Adaptability**
- Analytical Thinking**
- Critical Thinking**
- Initiative**
- Resilience**
- Time Management**

EDUCATION

Cagayan State University - Carig Campus

Bachelor of Science in Computer Science

Tuguegarao City, Cagayan

Sept 2022 - May 2026

- GWA: 92.32
- Consecutive Dean's Lister
- With Merit
